

Always wanted to have some detail pics from a TT engine since I don't have a engine sitting in my garage to pin point each hose, solenoids and other shit. Couldn't stop myself to share the pics from a seller who is selling 94 low km stock TT engine. Pics will help noobs like me to find out where is the EGR, boost solenoids, stock turbo setup etc without asking too many questions 😊

Note the marking in red. L40P for the engine 89 to 95 and L48P for 95+ engine
